# DAX-RED

Heatwave-Red X Ranger-Red VG-89 MAX X Doc 8784 EX-96

DAX-RED comes from one of Doc 8784's best daughters, Duckett Ranger 1133-ET VG-89 MAX. 1133 is a beautiful young cow that offers a unique spin on the Doc 8784 line as a Red Carrier.

We mated her to the popular sire Heatwave-Red to create the first Red & White member of this impressive family line! DAX-RED will complement many of the current Red & White bloodlines and offers index, type and production.

Use him on daughters of Rompen-Red, Warrior-Red, Acetylene-Red, Hulu\*RC, Alpha\*RC, Lambda, and Alligator.
